

DCS-50S 电子定量包装秤

DCS-50S Electronic Quantitative Packaging Scale

1、电子定量包装秤是一种工业自动化称重包装设备，主要用于化工、化肥、粮食、饲料等行业的颗粒状或粉状物料定量分装。适用于粮食、大米、坚果、猫砂、宠物料等领域的颗粒 物料定量包装。

1. Electronic quantitative packaging scale is an industrial automated weighing and packaging equipment, mainly used for quantitative packaging of granular or powdered materials in the chemical, fertilizer, grain, feed and other industries. It is suitable for quantitative packaging of granular materials in the fields of grain, rice, nuts, cat litter, pet food, etc.

2、独立的包装重量输入、称重重量显示窗口、显示窗口采用高亮度LED显示、实时显示包装重量、累计产量、包数，称量精度高，速度快

2. Independent packaging weight input, weighing weight display window, display window uses high-brightness LED display, real-time display of packaging weight, cumulative output, number of packages, high weighing accuracy and fast speed

3、包装时物料不结块、不破坏物料形态；物料不易在包装机中残留，易清洁

3. The material does not clump during packaging and does not destroy the material shape; the material is not easy to remain

合肥宇成机械制造有限公司
HEFEI YUCHENG MACHINERY CO., LTD

in the packaging machine and is easy to clean

4、该设备由储料仓、称量斗、夹袋机构及电气控制系统构成，采用动态称重技术，通过快慢双级供料实现精准计量

4. The equipment consists of a storage bin, a weighing bucket, a bag clamping mechanism and an electrical control system. It uses dynamic weighing technology and achieves accurate measurement through fast and slow dual-stage feeding.

名称	DCS-50S
电源	AC 220V, 0.15Kw
包装速度	500-1000 包/小时;
耗气量	0.4~0.6MPa, 0.6m ³ /min
包装范围	5-50Kg
包装精度	±0.1
设备总尺寸	1030mm*780mm*2480mm

Name	DCS-50S
Power supply	AC 220V, 0.15Kw
Packing speed	500-1000 bags/hour;
Air consumption	0.4~0.6MPa, 0.6m ³ /min
Packing range	5-50Kg
Packing accuracy	±0.1
Overall dimensions of the equipment	1030mm*780mm*2480mm
